## Voyager Solutions On Board With The Euros

*The European Slowpitch Softball Championships are delighted to welcome Voyager Solutions as the Title Sponsor of the event. The competition, taking place at the Southampton University Sports Ground from the 9th July - 12th July, involves teams from across Europe. Great Britain are hoping to defend their title won two years ago in Slovenia.*

*The British Softball Federation (BSF,) who is hosting the Championships, is thrilled to have Voyager Solutions aboard. Roger Grooms, lead organiser of the event on behalf of the BSF, said of the tie-up with Voyager Solutions "This is brilliant. Without Voyager this event would be nowhere near as big as it is and may not have even happened – now with Voyager on board, and the level of support they are investing, we can make this competition a memorable occasion. Voyager has worked with some of the biggest companies out there. The fact they have chosen to work with us is a fantastic reflection on the time and effort the BSF are going to in organising this major European sporting event".*

*Paul Taplin, Managing Director of Voyager Solutions, views the sponsorship of the Euros as an exciting opportunity; "We have been delivering successful organisational change programmes for the last 10 years and have more recently further expanded our European presence through some new critical relationships. We are delighted to sponsor a sport which brings together European teams and focuses on both individual and team performance. In our game, we are winning on exactly the same basis!"*

*With a fresh approach to organisational change management, Voyager Solutions has delivered over 25 major programmes to an International blue chip client base. Working with people at all levels to deliver successful process or technology based change, Voyager has access to the most talented organisational change Consultants around and has a dynamic team of professionals working to deliver focused, positive, and professional results. Voyager delivers every day with the passion of a start-up company, but the experience of a consulting firm with 10 years in the industry.*
